WHAT TYPE OF PERMIT(S) DO I NEED?

The following information is a brief overview. If you are uncertain, always contact the Building Code Official (BCO) and the Zoning Officer to confirm permitting requirements prior to proceeding with your project.

The following guidelines apply to single-family dwellings, two-family dwellings, townhouses and structures that are considered to be accessory to these types of residential structures. Any other uses or proposed construction would be considered "COMMERCIAL" and must comply with the requirements for commercial buildings. Please contact the Building Code Official (BCO) and Zoning Officer for more information on how to determine the requirements for any proposed commercial construction.

FEES: The required application fee is due with all residential Zoning Permit applications. Any additional zoning fees are due upon issuance of the permit. The building permit fees are separate from the zoning fees and are due upon issuance of the permit.

Please keep in mind that doing work regulated by the Uniform Construction Code (UCC) without a permit will result in an enforcement action being taken against you by the municipality, and upon conviction, you may be subject to fines and penalties up to and including \$1,000 per day of each violation.

Also, occupying any structure without a Certificate of Occupancy issued by the BCO is a serious violation and will also result in enforcement action. Please do not occupy or begin using any structure without a Certificate of Occupancy.

If you fail to obtain permits, inspections and certificates of occupancy, it is very likely that you will have serious difficulties when you eventually try to sell your house or property, as all structures built since April 9, 2004 must have a legal certificate of occupancy.
